TECHNICAL SKILLS

Languages: C, C++, JavaScript, TypeScript, SQL
Backend: Node.js, Express.js, REST APIs, Prisma, Sequelize, Socket.IO
Frontend: React.js, TailwindCSS, HTML, EJS
Databases: PostgreSQL, MongoDB, MySQL, SQLite
Tools & DevOps: Git, GitHub, Docker, Postman, Cloudinary

WORK EXPERIENCE

Full Stack SDE Intern

November 2025 – April 2026

Redhawk Consultancy

Remote

- Delivered the official consultancy website, improving client engagement and reducing page load time by 30%.
- Mechanized consultation workflows using email-driven notifications, reducing manual follow-ups by 40%.
- Owned frontend architecture using React.js and TailwindCSS, achieving consistent responsiveness across mobile and desktop devices.

Backend Developer Intern

May 2025 – July 2025

Charusat University

Remote

- Engineered and launched a centralized academic project management system serving 1000–1200 students and 100+ faculty members.
- Systematized project allocation and mentor assignment workflows, eliminating fully manual paper-based operations.
- Designed a dynamic student ID generation mechanism based on department, semester, and degree.

PROJECTS

CodePie

PostgreSQL, Express.js, React.js, Node.js, Judge0, Docker, SQLite

- Architected a competitive programming platform supporting contests and topic based practice problems; adopted by Charusat University for DBMS, DSA, DAA, and CP assessments.
- Extended SQL support via isolated Docker containers running SQLite3 per submission, dynamically creating schemas and executing student queries in a sandboxed environment.
- Introduced solo and team contest modes with computed team scoring and real time leaderboards; stress tested backend to reliably handle 1000+ concurrent submissions.
- Developed extensible admin tooling for contest configuration and problem management; optimized leaderboard computation via cron scheduling, reducing database write load.

Git History Storyteller

Node.js, Express.js, TypeScript, React.js, PostgreSQL, Prisma, Gemini API, Python

- Built a GitHub repository intelligence platform that analyzes commit history and generates AI-powered narratives, contributor profiles, and onboarding guides using Gemini API.
- Implemented a RAG-powered QA pipeline with pgvector for semantic search over repository digests via a Python gitingest bridge.
- Designed a circuit-breaker backed LLM provider system supporting Gemini and Ollama with configurable fallback and cooldown strategies.

EDUCATION

Charotar University of Science and Technology

2023 – 2027

Bachelor of Technology in Computer Engineering – CGPA: 9.10

Anand, Gujarat, India

Courses: Operating Systems, Data Structures and Algorithms, Machine Learning, Cloud Computing, Networking, Databases

LEADERSHIP AND ACTIVITIES

Team Member – CodePie

2024 – Present

codepie.app

- Organized CP events at Cognizance '26 and Charusat Tech Fest with 600+ participants; coordinated Charusat University integration for DBMS, DSA, DAA, and CP assessments.

Core Team Member, Web Dev – GDG Charusat

2025 – 2026

gdgcharusat.dev

- Contributing to web development initiatives and technical events; won GDG TechSprint in the Open Source Contribution track.

CERTIFICATIONS AND ACHIEVEMENTS

- OdooX Amalthea – IIT Gandhinagar: 1st Runners Up
- OdooX NMIT Bangalore Hackathon: Top 7 Finalists
- GDG TechSprint: Winner – Open Source Contribution
- NPTEL – Data Structures & Algorithms
